

**Maths:** In maths we will consolidate our work on place value and will investigate Roman numerals. We will find out more about 2D and 3D shapes, including work on plotting shapes on grids. We will also continue our ongoing work on learning number facts and times tables.

### Geography Project Overview

During this coming half term, our project will be based on The Mediterranean. We will investigate how the climate and physical geography of this region has shaped the history and development of human settlement and civilization, and we will find out about many cultural aspects associated with Mediterranean countries.

### English

Our focus in English will initially be on play scripts. We will look at Shakespeare's *Midsummer Night's Dream* and will practise writing our own scripts. We will then look at different types of persuasive writing.

### PE

This term we will be developing skills in tennis and cricket and we will be having weekly swimming sessions.

**RE** This term we will be finding more about Pentecost and its importance to Christians.

### PSHE

In PSHE we will be looking at online stranger danger and the importance of not sharing information.

### Spanish

In Spanish we will learn more types of food and will consolidate key conversational phrases.

### DT

In DT this term we will look at food preparation and creating a healthy and varied diet.

### Global Learning Focus

**SDG 10 Reduced Inequality**

### Music

In music we will be looking at the Beatles. We will focus on the song *Blackbird* and will find out about the band's other work and their influence. We will continue to work with glockenspiels to play, compose and improvise tunes.

### Computing

In computing we will look at audio editing software and will find out all about how sound and music can be recorded and edited digitally.

### Science

In Science we will be looking at living things with a particular focus on classifying different types of animal and on how animals have adapted to changing habitats.
